

This fully framed pivot opening door enclosure will feature well in all styles of bathrooms. Constructed from safety glass and enhanced by an aluminium frame with quality engineered fittings, this screen is easily maintained. The frame is in a durable powder coated or anodised material and available in a selection of colours. The sill is raised to reduce the amount of water splashing onto the floor under the door.

The 500 series is a stylish, functional and affordable screen, with a configuration to suit your requirements.

Fully Framed Pivot Showerscreen
